

Dear Ambassador Vesna Terzić,

on behalf of our dean Assoc. Prof. Klavdija Kutnar, PhD we are kindly asking you to share the attached flyer on your FB account and/or through your mailing list. It contains important information about the possibility to enrol into the undergraduate and the postgraduate study programme Mathematics in English language on University of Primorska Faculty of Mathematics, Natural Sciences and Information Technologies – UP FAMNIT (Koper, Slovenia).

In the last three years, the number of foreign candidates on the study programme Mathematics has been increasing, and a significant number of participants and winners of international mathematics competitions have become our students.

The Faculty is actively involved in the international field of higher education and research, and has established a wide network of research links with reputable foreign universities. The confirmation of the quality of our pedagogical and research work is the fact that our Faculty will co-organize the next European Congress of Mathematics in 2020.

The application to our Faculty may be interesting for young mathematicians from your country especially because citizens of EU countries and of ex-Yu countries do not pay any tuition fees, and students from other countries can apply for a scholarship (up to 450 EUR per month), which covers all the study costs and the accommodation expenses.

You can find more information about our Department of Mathematics [on this link](#) or on our website www.upr.famnit.si.

For any further questions do not hesitate to contact us,

Looking forward to hearing from you soon,

Best regards,

Mitja Tretjak
